

## Standing Order Templates for General Practice

Collaborative Aotearoa's Paramedic's in Primary Care working group have worked together to create standing order templates that practices can adopt for their own practice use. We have created these as profession agnostic so all health professionals who have the competency to administer can be signed off against these standing orders.

These standing order templates have been created by the working group and others have been added by Southern Health Pathways (a collaboration between Te Whatu Ora Southern, WellSouth PHO and community health pathways).

It is important that the general practices adopting these templates have a standing order policy in place, a training process and register for their team members and an auditing process that aligns with the practices policy.

Standing Order Template Title	Review Date	Published Link
Acute Asthma in Adults Standing Order template	August 2025	<a href="#">Link</a>
